

What does Faster Commissioning mean for you?

Reduce crew costs, dispatch energy to the grid sooner, and start making money in **14 days.**

76% faster

FlexGen commissions your battery storage projects **76% faster** than the industry standard.

Say goodbye to 2 months of EMS commissioning

Speed

To speed this up, we use your selected hardware to pre-configure your HybridOS energy management system in our innovation lab before arriving in the field.

Cost-effective

Timely, cost-effective project delivery depends on the critical role of commissioning services. But the industry standard—60 days—is too slow in our opinion.

Our pre-field optimization lets us get your project online **in just two weeks.**

Why FlexGen?

- ✓ Fast, expert services help you generate revenue while controlling costs and reducing risk.
- ✓ Adherence to the latest industry standards to ensure compliance.
- ✓ Experience in all major energy storage markets.
- ✓ Optimal methods to increase efficiency, quality, and safety .
- ✓ Comprehensive storage-component testing to ensure correct battery storage operation.
- ✓ Remote testing capability to speed testing and visibility into data.

Get More Value in Less Time

FlexGen’s industry know-how enables **interconnection readiness**, empowering you to extract value from your projects ahead of schedule.

Go With Trusted Experts

With over **10 years** of experience

With an established reputation, FlexGen has mastered the art of commissioning a diverse spectrum of new products across numerous applications.

Through this journey, our expertise has flourished, and we are poised to guide you in harnessing the full potential of this exciting opportunity.
